

DEJI
Industrial Automation System

发展历程 HISTORY

- Deji Established, mainly provided facilities for injection machines
- 德机成立，经营塑胶辅机设备

2005

- Begin manufactured central material feeding system for injection machines
- 生产中央供料系统

2008

- 设计生产非标设备系统

2010

- Capital was increased to RMB 12 million
- Floor area ~ 6000 m²
- ISO90001 and CE certificates
- 注册资金增资到1188万
- 公司面积约6000 m²
- 导入ISO9001，通过CE认证

2012

2007

- Provide factory assembly line
- 生产流水线系统

2009

- Start designing and manufacturing jig and fixtures for production lines
- 设计生产工装治具

2011

- Develop and produce AGV for factory logistics
- 研发生产自动引导AGV运输系统

2014

- BU diversification:
 - precise machinery department
 - Logistics automation department
- Application:
 - Automobile, 3C products, home appliances
- 设立部门：
 - 精密机械事业部
 - 自动物流物料事业部
- 发展方向：
 - 汽车、3C电子、家电、其他

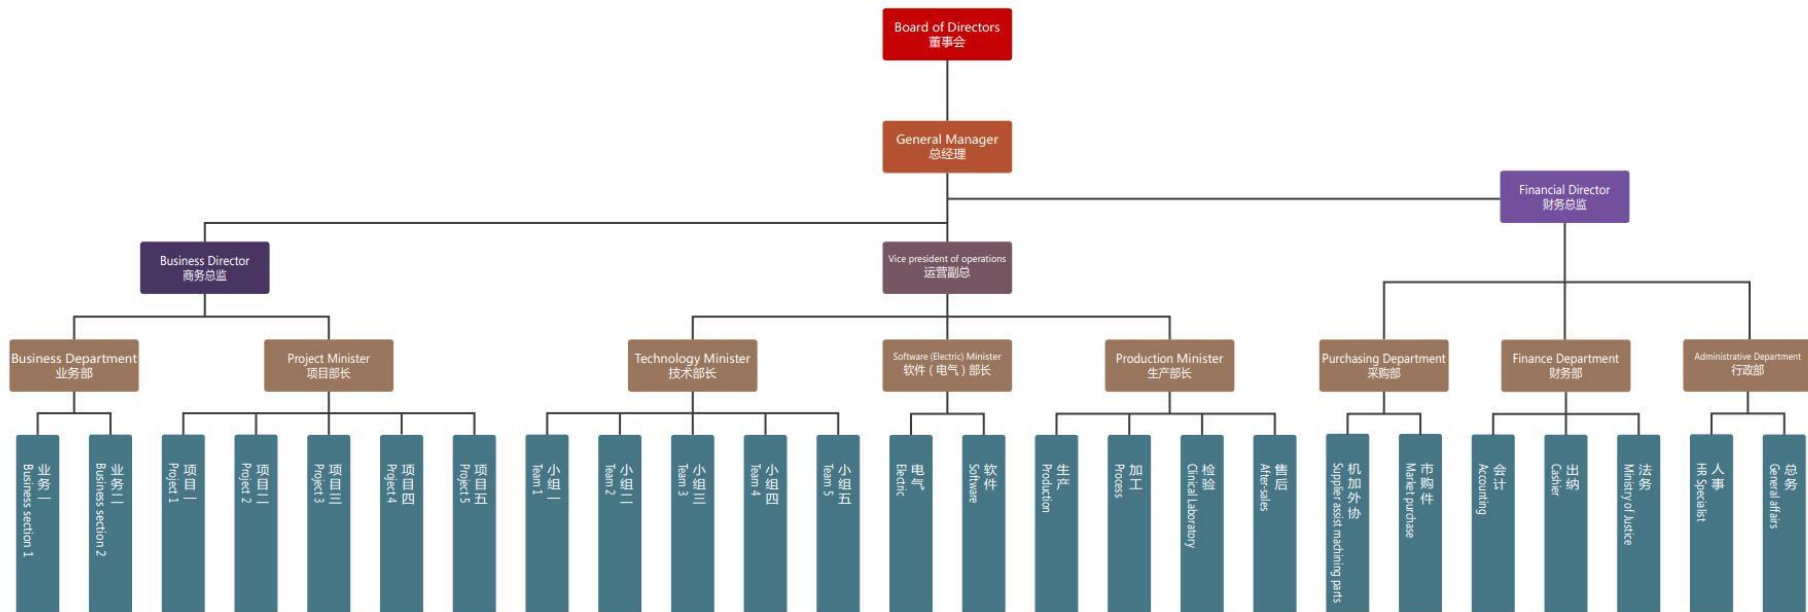

We only do one thing. Make thing possible!

Experienced of providing automation solutions to 3C Consumer Products, Automobile, Home Appliances, and more....

组织架构

ORGANIZATION CHART

Precise Machinery Engineering Office

Logistics Automation Engineering Office

Machining Centers & Workshop

DEJI capability can meet any requirement

We have more than 80 staff members,

Advanced CNC machining centers

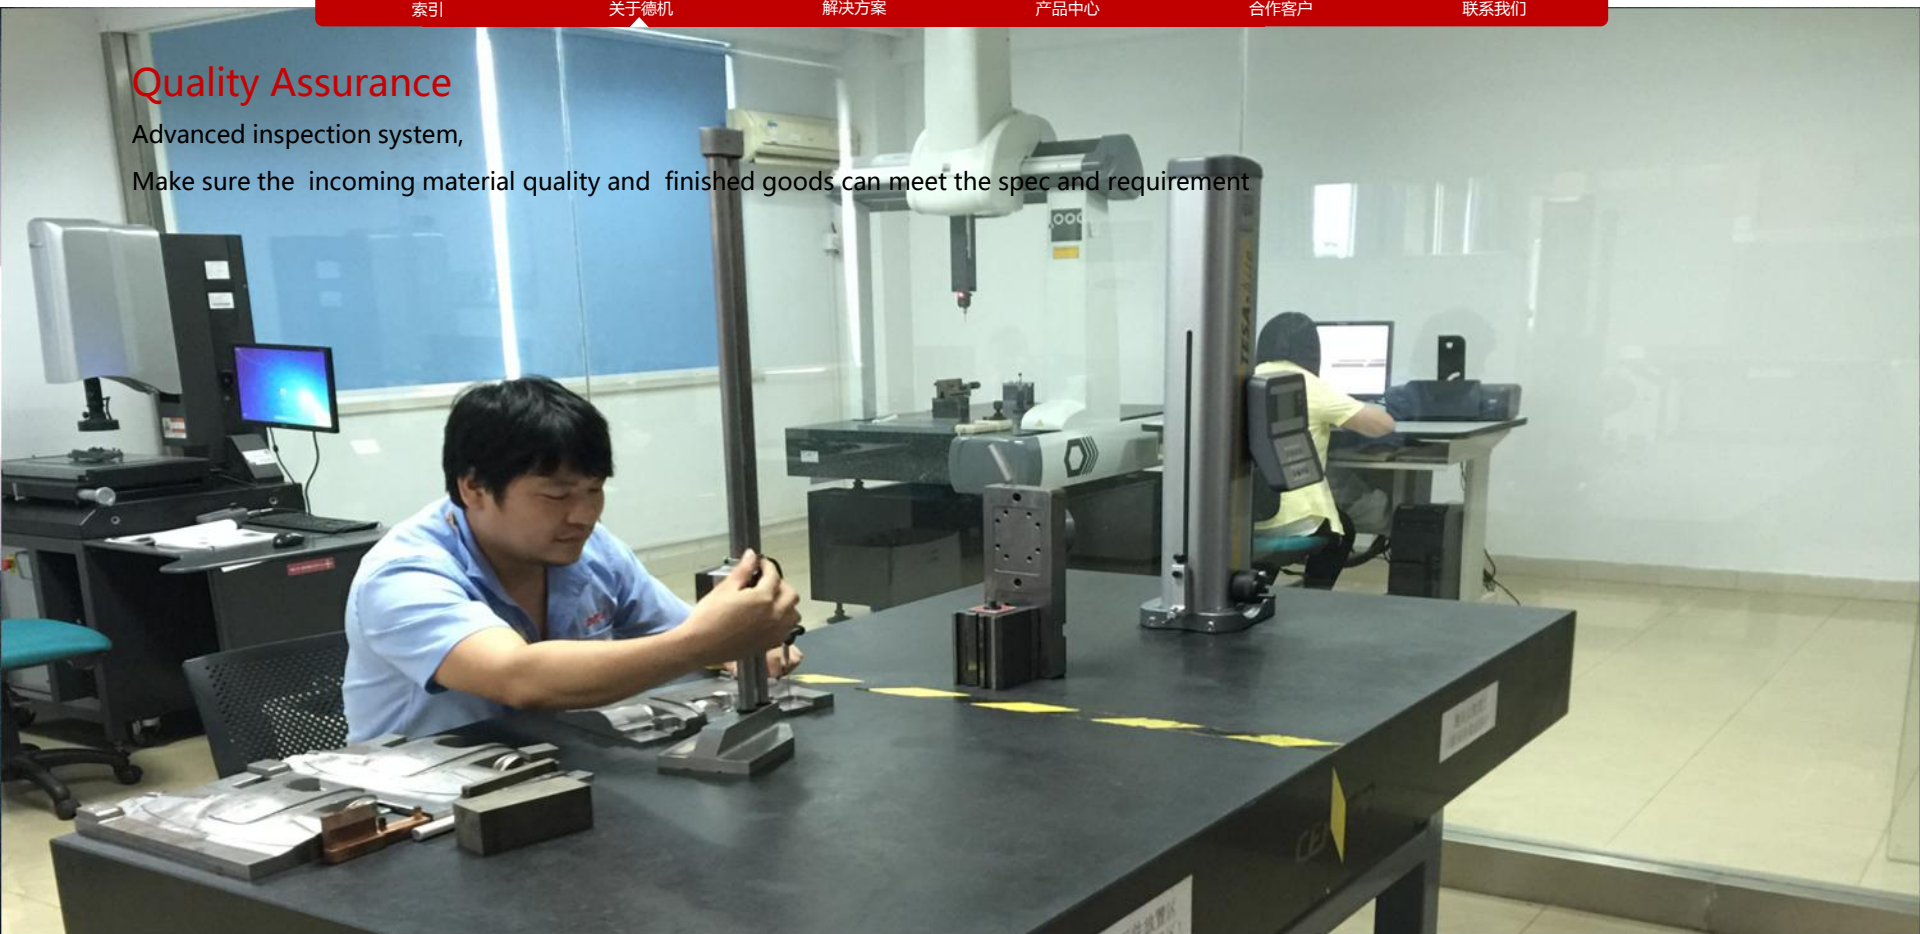

External machines support

Quality Assurance

Advanced inspection system,

Make sure the incoming material quality and finished goods can meet the spec and requirement

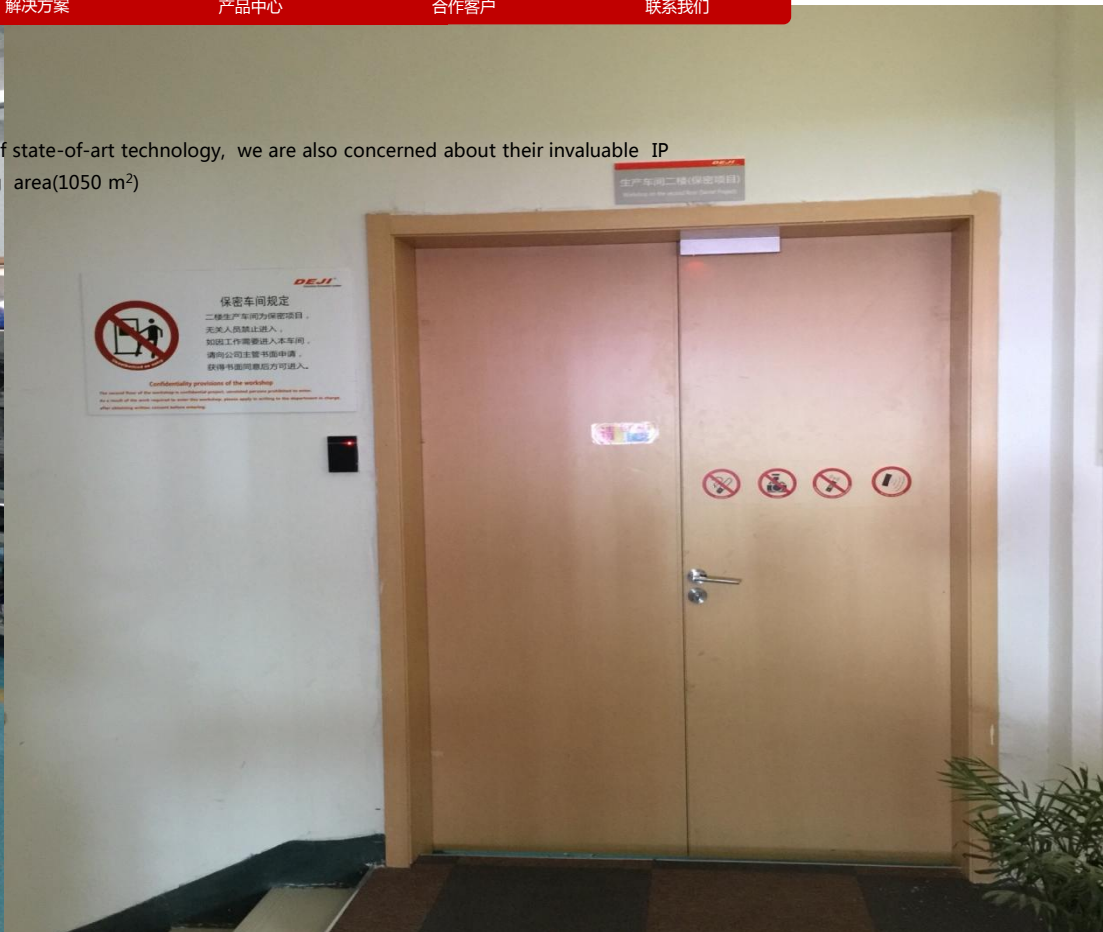

General-Purpose Assembly Section(G/F)

Tailor make a machine from every single elementary component...

IP Workshop (1/F)

Since most of our customers are producing product of state-of-art technology, we are also concerned about their invaluable IP and protect the making process in the confined working area(1050 m²)

调试 Testing & Debugging

DEJI possesses the necessary software and hardware capabilities for designing, testing and debugging the machines during production and post-production services.

Post Sale Service

Quick Response, Experienced and Strong workforce as your strong support and backup

Automation Solutions

DEJI provides the industry solutions for 4 main area: HA, 3C products, Automobiles and Motors

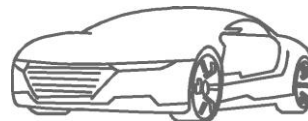

Home Appliance Oriented

Vacuum Cleaner Assy Line
Air Purifier Assy Line
Water Purifier Assy Line
Soya Bean Milk Machine Assy Line
Fruit Jam Machine Assy Line
Hanging Ironing Machine Assy Line
Grass Trimmer Assy Line
Online Component Assy and Inspection

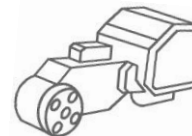

3C Products Oriented

U-TOP CLAW Soldering Machine
Laser Welding Machine
Backlight Detector
Light Leakage Detector
Flatness Inpection Machine
Polisher
Automatic Packaging Machine

Autoimoible Industry Oriented

Welding Robot Arm
Car Battery Inspection Line
Dynamo Assy Line
BOSCH spark plug Fully Automatic Assembly Lines
Automatic Packaging Machines

Motor Oriented

Motor Stator Production Line
Motor Armature Production Line
Dynamic Balacing Machines
Winding Machines
Ageing Machines for motor run-in
Autmatic Packaging Machines

Historic Cases

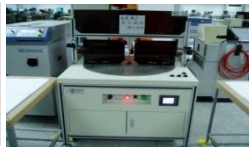

Products of Precision Machinery Section

Tailor Made Machine of various kinds & different purposes
